

Lemington Riverside Governor Profile

Robert Wilson

Co-opted Governor

Who am I: I joined the Governing Body in May 2019 after retiring from working for many years within education establishments – mainly in the finance office of a local university and also for a number of years for Governor Services at Newcastle City Council and for the last eight years as School Business Manager at a large primary academy located in the City.

Skills and Expertise: My skills lie mainly in the area of finance – but in addition I have some knowledge of Health and Safety and more generally of the business side of schools. Because of my background I am a member of the Finance, Premises and Resources Committee

Why I am a Governor at Lemington Riverside: Whilst I am now retired from employment I still feel that I have the necessary skills and expertise to make a contribution towards the work of the Governing Body and so to be able to put something back to help in the education of young people.

What I like about Lemington Riverside and my vision for us as a school moving forward: I find Lemington Riverside to be a very pro-active and friendly school with close links to the local community. For the future, my vision would be to keep making continual improvements towards becoming an Outstanding School but without the school losing any of its existing character and ethos.
